EXPERIENCE

Ethical Hacking & Penetration Testing Intern

C-DAC , NOIDA | Dec 2024 – Jan 2025

- Developed Python-based diagnostic and automated test scripts to assess system reliability and supportability on Linux environments — directly aligned with embedded test automation practices.
- Built and executed multi-stage security test scenarios (reconnaissance, exploitation, privilege escalation); documented findings and remediation strategies analogous to CI/CD validation reporting.
- Analyzed IP protocol weaknesses, VLAN misconfigurations, and Ethernet-level attack surfaces using Wireshark and Nmap; applied root cause analysis to identify systemic issues.
- Collaborated with team members to streamline assessment workflows, improving testing efficiency and documentation quality.
